

CRITICAL LAUNCH BLOCKER: Bug #2585 Regression – Event Map Roster Overlay (Slide 2)
Non-Functional

10/21/2026 06:47 AM - stephen koeplinger

RESTORE INTERACTIVE SLIDE LAYERS: Re-compile the calendar.svg click-event triggers to ensure the roster overlay slides into view seamlessly without scripting or template deployment failures.</div> <div>2. RECREATION SUBDOMAIN PURGE ONLY: Execute a complete table truncation across all transactional activity logs, dummy rosters, and fake volunteer hours on recreation.bundini.co.uk. Wipe out all worthless test data. Keep the core database schema, system tables, and admin user structures perfectly intact.</div> <div>3. CRITICAL DATA PROTECTION GUARDRAIL: Do NOT touch, modify, or reset any databases, tables, or directories associated with parks.bundini.co.uk. The park maps, boundaries, and garden layouts for Langa Street Nursery are fully validated and must remain completely untouched.</div> <div>4. ESTABLISH CLEAN ACCOUNTS: Isolate the active recreation database directory to accept only clean, verified data records starting immediately with real, localized project execution entries.</div> <div>=====</div> <div>ACCEPTANCE CRITERIA FOR CLOSURE</div> <div>=====</div> <div>Do NOT close this ticket or alter the progress metrics until the live system successfully registers a real user task allocation, updates the volunteer folio dynamically, and handles the data layout without crashing.</div> <div>Actual Result:</div>			

The UI stays completely flat and non-functional. The interactive slide 2 user state (the dynamic roster overlay) fails to instantiate. Users cannot view the participant roster or access interaction buttons.

Expected Result (As locked in original specifications):
Clicking the garden map zone must immediately launch the dynamic roster overlay (Slide 2). This roster must present functional selection checkboxes for volunteers to check off child-friendly tasks, specifically:

- Water
- Weed
- Bed / Sow Seeds

=====

MANDATORY REMEDIATION DIRECTIVES FOR PROBRAINS

=====

1. RESTORE INTERACTIVE SLIDE LAYERS: Re-compile the calendar.svg click-event triggers to ensure the roster overlay slides into view seamlessly without scripting or template deployment failures.

2. DATABASE DATA PURGE ENFORCEMENT: Execute a complete table truncation across all transactional activity logs, dummy rosters, and fake volunteer hours on recreation.bundini.co.uk. Wipe out all worthless test data. Keep the core database schema, system tables, and admin user structures perfectly intact.

3. ESTABLISH CLEAN ACCOUNTS: Isolate the active database directory to accept only clean, verified data records starting immediately with real, localized project execution entries.

=====

ACCEPTANCE CRITERIA FOR CLOSURE

=====

Do NOT close this ticket or alter the progress metrics until the live system successfully registers a real user task allocation, updates the volunteer folio dynamically, and handles the data layout without crashing.
